

# Buy A Star!

Cut out:

a page of yellow stars  
a brown strip of pennies  
a gray strip of nickels, dimes  
and quarters

Talk with your Space Partner about the value of each coin.

Make different combinations of coins to buy each star.

For example: a star that costs 15 cents could be paid for with 3 nickels, a dime and a nickel, 5 pennies and a dime, etc.

# Space Shadows

Tape a piece of black paper on the wall where the light is projected.

Use the tangram pieces to create a rocket ship, star or other outer space shape on the overhead projector.

Use a white crayon to trace the outline of the shape on the black paper.

Cut it out.

# Astronaut Identification

Glue a star onto the front of your official astronaut identification.

Cut out an astronaut.

Each space cadet will find a picture of him/herself in the baskets labeled by class. Glue your face onto the astronaut. Glue the astronaut on one side, inside the I.D. folder.

Fill out the official form and glue it inside the folder on the opposite side.
